What are Skin Boosters for?

Skin boosters are injectable treatments that deeply hydrate and improve skin quality. They make the skin smoother, more elastic and radiant.

Biorevitalization

This involves injecting hyaluronic acid to hydrate the skin, improve its texture, and restore a healthy glow. It's ideal for dryness, dullness, and early signs of aging.

Collagen Stimulators (like PLLA, Karisma, Radiesse)

These products trigger your skin to produce its own collagen. Over time, the skin becomes firmer, tighter, and more youthful. The effect builds gradually and lasts longer than with hyaluronic acid alone.

INJECTABLES

FILLERS

• Lip Augmentation

60 Min.

Combine your HIFU treatment with Collagen Boosters for greater lifting results

Karisma Rh Collagen Face

Karisma Rh Collagen Full Face Bio Lifting

Aesthefill PLLA

Radiesse (1x1.5ml)

Radiesse (2x1.5ml)

- **Quick**
- **No down time**

What is IPL for ?

- The hardware photo rejuvenation procedure is based on transformation of light into heat energy. Does not damage skin, painless
- Removes pigmentation
- Relieves redness and strengthens blood vessels, removes post-acne marks.
- Relieves inflammation in the skin when treating acne

HIFU

What is HIFU SMAS lifting for?

- HIFU uses focused ultrasound to lift and tighten the skin without surgery
- Works deep under the skin to improve firmness and reduce sagging
- Stimulates natural collagen for long-lasting lifting effects
- Safe and non-invasive, with no damage to the skin surface or downtime

V-MAX

What is Vmax Lifting for?

- Vmax uses microfocused ultrasound to lift and tighten the skin without surgery
- Gently heats deep layers to stimulate collagen, improve firmness, and enhance skin tone
- More comfortable than traditional HIFU, suitable even for very sensitive skin, but requires more sessions for best results
- Safe and non-invasive, with no damage to the skin surface or recovery time
